

## DEPOT360 MANAGED SERVICES

# Home charging

- **Regular reports sent directly to drivers**  
Convenient automated reimbursement process for you and your drivers.
- **Integration with your payroll<sup>1</sup>**  
It adds more convenience and transparency to your home charging reimbursement process.
- **24/7 driver support**  
With our 24/7 support, drivers receive around-the-clock assistance for accurate calculations of energy consumption and cost, allowing you to focus on overall program management.

## Telematics as the key for measurement

Unlike current solutions that base measurements on the charger, our solution utilizes vehicle telematics. This eliminates the need for expensive networked chargers and cellular connectivity, significantly reducing costs. Additionally, by using telematics, we ensure that reimbursements are only applied to company vehicles in the assigned home zone, eliminating the risk of misuse.

### Vehicle as basis of measurement

No risk of subsidizing non-fleet vehicles

### Secure and trustworthy

Cyber-secured and data privacy-compliant solution

### Charger agnostic

Works with any charging infrastructure setup

### Network independent

Connected chargers are not mandatory

<sup>1</sup> Current integration with Concur. For different payrolls, please consult your Siemens expert.
